Summary

React Native engineer with 2.5+ years shipping 20+ cross-platform apps to the App Store and Play Store — specializing in AI-powered mobile experiences: real-time AI chat, voice AI, streaming LLM responses, offline sync, push notifications, and WebRTC. Drove a live JS→TypeScript migration that eliminated a recurring runtime-error class, owned Stripe/PayPal billing with zero reconciliation failures, and cut API latency 35%. Integrates cloud and on-device AI (Claude, OpenAI, Whisper) and owns the release pipeline end-to-end — signing, store compliance, and monitoring.

Experience

Infinite Open Source Solution LLP, Full Stack Developer – Calicut, Kerala

Nov 2023 – Present

- **Cut feature delivery time 30% across 20+ web and mobile apps** by architecting a reusable cross-platform TypeScript component library that replaced per-project rebuilds.
- **Shipped AI-powered mobile features to production** — streaming Claude/OpenAI chat, Whisper voice AI, and conversational AI flows embedded inside React Native apps.
- **Eliminated an entire class of production runtime errors** via a full JS-to-TypeScript migration on a live React Native codebase with strict typing and type-safe API contracts.
- **Shipped 5+ React Native apps to App Store and Play Store independently** by owning the full release pipeline — signing, build configs, store compliance, and staged rollouts.
- **Built native modules (Kotlin)** bridging React Native to platform APIs — background geolocation, push notifications (FCM/APNs), and biometric auth.
- **Processed Stripe and PayPal subscriptions with zero reconciliation failures** by owning end-to-end billing — webhook verification, idempotent reconciliation, and retry logic.

Projects

AI Life Assistant Super App (React Native)

React Native • TypeScript • OpenAI / Claude API • Whisper • WebSockets • Reanimated • Native Modules (Swift / Kotlin)

- **Built a voice-first AI assistant** with streaming LLM chat, Whisper transcription, TTS playback, and tool calling — 60fps message animations on iOS and Android.
- **Engineered a custom native audio module (Swift / Kotlin)** for low-latency mic capture and VAD, plus offline-first SQLite sync and push (FCM/APNs) for proactive agent actions.

Cloud-Native IoT Analytics Dashboard (Mobile Companion)

React Native • TypeScript • WebSockets • SQLite • Redux Toolkit • React Query • Sentry

- **Streamed live device telemetry over WebSockets** into virtualized charts with alert acknowledgment and on-call paging across iOS and Android.
- **Engineered offline sync (SQLite + backoff retries)** plus FCM/APNs deep-link alerts and Sentry tracing for production crash MTTR < 1 hour.

AI-Powered Real-Time Collaboration Platform (React Native)

React Native • TypeScript • Yjs (CRDT) • WebSockets • WebRTC • OpenAI API

- **Built a CRDT-based collaboration app (Yjs)** with live presence, typing indicators, and conflict-free offline edits across iOS and Android.
- **Integrated WebRTC voice notes and inline AI** — streaming OpenAI completions, summarization, and tool calling on document selections at 60fps via Reanimated.

Education

BBA **SJES College of Management**, Bangalore North University — Bangalore, India

June 2019 – Oct 2022

Skills

Languages: TypeScript, JavaScript (ES6+), Python, Kotlin (familiar)

Mobile & Frontend: React Native, Expo, EAS, React, Redux Toolkit, React Query, Zustand, Reanimated, Gesture Handler

Native & Platform: Native Modules (Swift / Kotlin), Push Notifications (FCM / APNs), Background Tasks, Geolocation, Biometric Auth, In-App Purchases

Real-Time & Media: WebSockets, WebRTC, Voice / Video Calls, Real-Time Messaging, Streaming Responses, Offline Sync

AI / LLM on Mobile: Claude API, OpenAI API, Vercel AI SDK, Whisper (voice AI), streaming chat, tool/function calling, on-device AI, conversational AI

Backend & Data: Node.js, Express.js, REST APIs, WebSockets, JWT, OAuth, Webhooks, MongoDB, MySQL, SQLite, Redis

Cloud, DevOps & AI Workflow: AWS, Docker, GitHub Actions CI/CD, EAS, Xcode, Android Studio, Sentry, Claude Code, Cursor, Copilot
